## **FLORIDA ENERGY AND ENGINEERING FIRMS MERGE**

*New Headquarters Opened in Tallahassee*

**Tallahassee, Florida, January 21, 2019** – Two Florida-based firms, kW Control, and Modern Professional Engineering LLC have merged to become Facility Solutions & Management (FSM). Facility Solutions & Management delivers a comprehensive approach to optimizing facility design, system performance, energy management, and building controls.

FSM's proven expertise in three service divisions: Engineering Design (MEP), Energy Services, and Building Controls provide each client the opportunity for a one-stop, streamlined solution. The firm's project experience includes new construction and renovation of a wide range of buildings types including office, government, education, medical, hospitality, data centers, and retail for Florida, regional, and national-based clientele.

The firm's principals include Byron Davenport, Robert Gelhardt, Brian Moore, Jeremy Parker, and Collins Proctor. Speaking on the merger, Robert Gelhardt, Principal / Director - Engineering said, "Together the two firms are more effective and valuable to our clients. We provide a complete facility management solution, delivered by an experienced team of professionals."

Collins Proctor, Principal / Director – Energy Services said, "Simply put, we help make facilities work better while also eliminating wasteful operating costs. Our clients like having one point of accountability for the solution they need, *when* they need it."

Facility Solutions & Management is a Florida-based LLC, providing comprehensive facility services serving commercial, educational, government, and non-profit clients.
